

Description:

Ultra-high capacity. Absorbs all bodily fluids such as blood, urine, vomit, and body sweat, as well as all water-based fluids such as anti-freeze, cleaners, floor strippers, soaps, drinks, soups, paints, inks, floor finishes, etc.

Benefits:

- Leaves surfaces completely dry.
- Specially ground, finer and lighter particles instantly soak up more liquid - quick!
- Lightweight formula reduces back, arm, and leg strain.
- Reduces clean up times.
- Limits liability exposure.
- Promotes proper waste disposal.

Ideal For:

- Hazmat teams for spills on highways
- Fleet garages for spills on concrete floors
- Wastewater treatment plants for liquid polymer spills
- Tool and die shops for cutting fluid spills
- Manufacturing facilities around production equipment
- Floor care crews converting stripper/wax solutions into solid waste for proper disposal
- Print shops for inks and dyes
- Schools and hospitals for bodily fluid spills
- Food processing plants for leaks and spills

Time-Lapse Photography:

Application:

For on-going use: Sprinkle around equipment areas where leaks and condensation may puddle. INSTA-ZORB will absorb liquid into a thick gel so that it can be easily scooped up and disposed.

For spills: Cover the entire wet area with INSTA-ZORB. Let product absorb the spill and scoop up when all the liquid had been absorbed. Large spills or deep puddles may require more time or some turning to get liquid fully absorbed.

For stripper/wax solutions: Add a cap-full of INSTA-ZORB to the mop bucket and dispose of gelled waste properly instead of flushing it down drain lines where wax builds up and clogs drains.

Specifications:

Particle Size Distribution	100 - 500 microns
Gelling Time	6 seconds
Colour (visual)	White
Appearance @ 25°C (visual)	Free Flowing Powder
Odour	None
Absorption Rate	336 Litres of water per 1/2kg of Insta-Zorb
Health/Flammability/Reactivity	1 / 0 / 0
Personal Protection	B - Safety glasses and gloves
